VARIETY DETAILS

ORIGIN: UEB, Czech Republic

PARENTS: 'Barby' x 'SQ 159' (Natyra®)

GROWTH: medium to vigorous growth, spreading habit, well branching

HEALTHCHARACTER: distinctive health, tolerant to scab (polygenic-based resistance), little susceptible to mildew, dark green and very vital leaves

BLOSSOM: medium (with Jonagold), diploid

RIPENESS: mid to end of September depending on location, about 10 days before 'Golden Delicious'

APPEARANCE: medium to large, spherical, medium-long stalk, light yellow skin, intense yellow colour in storage, unruined, sometimes with a light orange blush, offers a variety in the shape of the fruit

QUALITY: Flesh firm to medium, very crunchy and juicy

TASTECHARAKTER: Fully aromatic, very good flavour, balanced sugar/acid ratio, ripe for consumption shortly after picking

CROPYIELD: early setting, high and regular without alternate bearing

STORECHARACTER: In cold storage until April, in ULO (1°C, 1.2% O2, 2.2% CO2) until July

SPECIAL NOTES: self-thinning, unusually long shelf life for an autumn variety, particularly suitable for both intensive and extensive organic cultivation, best suitability for processing
