VARIETY DETAILS

ORIGIN: Agroscope, Switzerland

PARENTS: 'Maigold' x 'Arlet'

GROWTH: medium strong, good branching and garnishing, very easy tree management

HEALTHCHARACTER: no resistances, but only very low susceptibility to scab and mildew, robust tree with healthy leaves

BLOSSOM: medium early, diploid, suitable pollinators are among others 'Gala', 'Rubinette', 'Braeburn'

RIPENESS: end of October, with/shortly after 'Fuji'; ripe for consumption from December onwards

APPEARANCE: medium-sized, elongated to cylindrical, red apple with a yellow-green base colour

QUALITY: sehr festes, saftiges Fruchtfleisch, ausgezeichnetes Shelflife

TASTECHARAKTER: sour-sweet aroma, very aromatic - among the leading varieties in all tastings

CROPYIELD: very good, regular, total yield per tree is over 90 % for size 60-80 mm

STORECHARACTER: very good and unproblematic, in cold storage until the beginning of April, in CA storage until the end of August (without 1-MCP).

SPECIAL NOTES: harvest recommended when colour changes from brownish-red to red, otherwise loss of flavour. Slight susceptibility to bitter pit, depending on location, can be prevented with calcium.
