

VARIETY DETAILS

ORIGIN: VSUO, Holovousy, CZ

PARENTS: 'Kordia' x 'M. Reward'

GROWTH: strong, good branching, upright

HEALTHCHARACTER: healthy and robust tree

BLOSSOM: late, S alleles S4S6, suitable pollinators are among others: 'Regina', 'Kordia', 'Skeena', 'Duro 3', good pollinator for 'Regina'

RIPENESS: in the 7th Cherry Week with 'Regina'

APPEARANCE: 28-30 mm in diameter, homogeneous, heart shaped, attractive with smooth, dark red fruit skin with a beautiful shine, like 'Regina'

QUALITY: juicy, medium-firm to firm flesh

TASTECHARAKTER: fruity aroma with balanced sugar-acid ratio, sugar content 17°-18°Brix

CROPYIELD: regular and high yields

SPECIAL NOTES: Not susceptible to premature fruit drop compared to Regina. Cultivation on weak rootstocks recommended (as with 'Regina') with initially restrained pruning that promotes fruiting wood.
