VARIETY DETAILS

ORIGIN: Dr. Walter Hartmann, Germany

PARENTS: 'Ortenauer' x 'Stanley'

GROWTH: weak to medium growth, very good tree shape & loose structure of the canopy

HEALTHCHARACTER: PPV resistant, some susceptibility to Pseudomonas, therefore plant on good plum soils if possible

BLOSSOM: early flowering, self-fertile

RIPENESS: September, long harvest window; at least half of the flesh must be yellow in colour when harvested

APPEARANCE: oval, dark blue fruits with light blue wax bloom, medium to large size

QUALITY: firm and juicy, stones detach well

TASTECHARAKTER: sweet-sourish, harmonious

CROPYIELD: yield early, high and regular

SPECIAL NOTES: late frost locations should be avoided because of the early flowering; for a good aroma, pay attention to the right picking time, as it colours early (if not yet ripe).
