VARIETY DETAILS

ORIGIN: Dr. Walter Hartmann, Germany

PARENTS: 'Katinka' x 'Zwintschers Frühe'

GROWTH: medium strong with flat branches, easy tree management

HEALTHCHARACTER: PPV tolerant

BLOSSOM: medium early, tolerant to frost, self-fertile

RIPENESS: beginning to middle of July, very uniform ripening

APPEARANCE: dark blue to slightly purple fruit, elongated, domestic plum size

QUALITY: stone detaches very well from the yellow-green to light-yellow flesh, which is still surprisingly firm even when fully ripe; best baking quality

TASTECHARAKTER: flavorful with a very pleasant sugar/acid ratio

CROPYIELD: high and regular

SPECIAL NOTES: heat-resistant, thinning recommended for larger fruits, a real alternative to the traditional early varieties, especially because of the excellent taste

RIPENING TIME:

MONTH:
