## VARIETY DETAILS

**ORIGIN:** Hans Jörg Gmeiner, Germany

**PARENTS:** Chance seedling

**GROWTH:** slightly stronger than 'Red Lake'

**HEALTHCHARACTER:** very good wood health, therefore best suited for single-shoot spindle cultivation; high susceptibility to mildew as with 'Red Lake'

**RIPENESS:** end of June, before or with 'Red Lake', very long harvest window

**APPEARANCE:** long clusters with very large bright red berries; average cluster length 8-11cm with 17-25 berries per cluster, fruit diameter 8-10mm; stable colour even when very ripe

**QUALITY:** not susceptible to cracking, long stalk, good pickability

**TASTECHARAKTER:** very mild aroma, as compared to other varieties little acidity

**CROPYIELD:** regular and high yields with very good fruit quality due to shoot performance

**STORECHARACTER:** excellent, both in the normal cold store and in the CA store

**SPECIAL NOTES:** very fertile, sharp pruning necessary, denser leaves, therefore less risk of sunburn
