VARIETY DETAILS

ORIGIN: Hans Jörg Gmeiner, Oberkirch, Germany

PARENTS: Mutation of 'Red Lake'

GROWTH: moderate growth, excellent spread of side shoots

HEALTHCHARACTER: very healthy wood, high susceptibility to mildew (like 'Red Lake')

RIPENESS: mid-June, very early, about 7-10 days before 'Haronia', in southern Baden in the second half of June

APPEARANCE: long clusters with large bright red berries, already fully coloured a few days before harvest, size of berries similar to 'Haronia'.

QUALITY: no cracking, long stem, easy to pick, berries are firm, very juicy, with small seeds inside

TASTECHARAKTER: very sweet, with strong aroma, pleasant taste

CROPYIELD: optimal, regular every year, long harvest window

SPECIAL NOTES: thinning requirements are much lower compared to 'Haronia', can be grown as a spindle with one shoot
