**COMPREHENSIVE RANGE** for the highest demands

**MIROMA®** the attractive one

*robust – productive – aromatic – freestone fruits*

- GROWTH:** medium growing
- HEALTH:** very robust
- BLOSSOM:** late, self-fertile
- RIPENING TIME:** End of August
- FRUIT:** yellow, tending to orange with red cheeks, round oval
- QUALITY:** firm pulp, easy to remove stones
- TASTE:** very good, sweet and aromatic with a very high sugar content (20-30° Brix)
- YIELD:** early onset, high and regular
- INSTRUCTIONS:** beautiful presentation, robust variety for fresh marketing and especially for the distillery

**TOPFIVE®** the juicy one

*robust – aromatic – firm – productive*

- GROWTH:** medium strong, spreading growth habit
- HEALTH:** plum pox tolerant, low susceptibility to monilia and rust, very little tendency to rot, good leaf and wood health
- BLOSSOM:** medium late, very robust, flowers on annual and perennial wood; partly self-fertile
- RIPENING TIME:** mid to late August
- FRUIT:** rounded fruits, nice presentation, dark blue with strong wax bloom, good storability
- QUALITY:** flesh light yellow, firm, juicy
- TASTE:** very good, harmonious
- YIELD:** early onset and high yields
- INSTRUCTIONS:** suitable for fresh consumption, baking and for organic production, pollinators recommended for reliable yields: Presenta®, Mirabelle plums

**TOPHIT®** the large one

*plum pox tolerant – large-fruited – aromatic – productive*

- GROWTH:** medium-growing, spreading crown
- RIPENING TIME:** mid to late September, after 'President'
- FRUIT:** very large, egg-shaped, aromatic fruits with a uniform wax bloom
- INSTRUCTIONS:** pollinator necessary (Presenta®)

**TOPEND PLUS®** the late one

*robust – productive – crisp – storable*

- GROWTH:** medium growing, compact
- RIPENING TIME:** very late - late September to mid-October, long harvest period
- FRUIT:** large, elongated, beautiful wax bloom, aromatic fruits
- INSTRUCTIONS:** robust, healthy variety, very good storability, pollinator required, e.g. Presenta®, Mirabelle plums

**TRUEBLUE®** HOH 4528® the loyal one

*aromatic – firm – productive – robust*

- GROWTH:** strong growth, good branching, good ratio between growth and fruit set
- HEALTH:** healthy tree, plum pox tolerant
- BLOSSOM:** medium late, richly flowering, self-fertile
- RIPENING TIME:** end of July-beginning of August
- FRUIT:** egg-shaped, dark blue, uniformly sized fruits (39 x 54 mm) with a strong wax bloom, dark yellow flesh
- QUALITY:** firm pulp, medium juiciness, sugar content is medium. Stone size is medium with very good stone separation
- TASTE:** very good, aromatic
- YIELD:** regular and high
- INSTRUCTIONS:** no resistance to plum pox, but very robust, no fruit-symptoms

RIPENING TIME JULY AUGUST SEPTEMBER OCTOBER

PLUMS & PRUNES

RIPENING TIME JULY AUGUST SEPTEMBER OCTOBER

MIRABELLES

COMPREHENSIVE RANGE for the highest demands

AUGUSTINA® HOH 7286® BY ARTEVOS®

AUGUSTINA® HOH7286® the productive one

large – productive – stone-dissolving – aromatic

**GROWTH:** medium strong, semi-upright with good branching, good fruit distribution on the tree

**HEALTH:** very healthy tree, no leaf symptoms

**BLOSSOM:** self-fertile

**RIPENING TIME:** Mid-August

**FRUIT:** large fruits (average height 54cm, diameter 41cm), very beautiful dark blue color with wax bloom, no green spots

**QUALITY:** very firm, crunchy and juicy, yellow flesh, very good stone solubility, medium-sized stone, average 17° Brix

**TASTE:** good taste

**YIELD:** regular and stable over the years, very productive

**INSTRUCTIONS:** low sensitivity to blossom frost, no pre-harvest fruit drop, uniform ripeness

HANITA® BY ARTEVOS®

HANITA® the tasty one

large - rich - good baking quality

**RIPENING TIME:** mid-August to mid-September, long harvest window, fruits have to be picked more than one time

**FRUIT:** large, elongated, medium-firm, very aromatic fruits with a nice wax bloom

**INSTRUCTIONS:** medium strong, steep growth, branches should be formed in the first few years

HAROMA® BY ARTEVOS®

HAROMA® the aromatic one

aromatic – juicy – productive – self-fertile

**GROWTH:** medium strong, very beautiful crown structure

**RIPENING TIME:** end of August - beginning of September

**FRUIT:** firm, deep orange flesh, highly aromatic

**INSTRUCTIONS:** strong pruning and intensive thinning necessary to produce the aroma, plum pox tolerant

JOGANTA® NR. 7184 BY ARTEVOS®

JOGANTA® NR. 7184® the resistant one

large – plum pox resistant – self-fertile – productive

**GROWTH:** medium to weak, relatively compact, unproblematic tree

**RIPENING TIME:** mid-end of September

**FRUIT:** dark blue with wax bloom, oval and large to very large (53-90g), freestone fruits

**INSTRUCTIONS:** suitable for fresh consumption

JOFELA® NR. 7346 BY ARTEVOS®

JOFELA® NR. 7346® the elongated one

robust – heat tolerant – high yielding – aromatic

**GROWTH:** medium strong, with steep branches

**RIPENING TIME:** mid-late September, very long harvest window

**FRUIT:** elongated, like 'Felsina', medium-sized, dark purple, aromatic fruits with wax bloom

**INSTRUCTIONS:** plum pox tolerant, long harvest window, good taste, not suitable for cold locations

JOJO® BY ARTEVOS®

JOJO® the rich-bearing one

plum pox resistant – self-fertile – productive – firm

**GROWTH:** weak to medium growth, loose crown structure

**RIPENING TIME:** early to late September

**FRUIT:** oval, dark blue, medium-sized, medium taste

**INSTRUCTIONS:** remains stable on the tree, sensitive to frost

JUNA® BY ARTEVOS®

JUNA® the early one

plum pox tolerant – early – self-fertile – productive

**GROWTH:** medium strong with flat branches, easy to train

**RIPENING TIME:** early to mid July

**FRUIT:** very firm, dark blue to slightly purple fruits with a good taste

**INSTRUCTIONS:** heat resistant, thinning recommended, otherwise the fruits remain smaller

JULIKA® BY ARTEVOS®

JULIKA® HOH8679® the sweet one

robust – aromatic – stone-dissolving – solid

**GROWTH:** medium growth with good branching

**HEALTH:** insensitive to plum pox and robust to other diseases

**BLOSSOM:** medium early

**RIPENING TIME:** end of July, 2 to 7 days after 'Katinka' (depending on region)

**FRUIT:** large, round-ovoid fruits, dark blue with a nice wax bloom, with a similar ripening time, it has larger fruit than 'Katinka'

**QUALITY:** very firm flesh, yellow and juicy, the stone is medium-sized and dissolves very well

**TASTE:** very good taste, fully aromatic

**YIELD:** high and regular

**INSTRUCTIONS:** regularly high sugar content for an early variety, short harvest window
